

NEW

'3 in 1' cable rollers

Superstrong. Much easier, lighter, lower investment.

As a company, you use different types of cable rollers: normal rollers in various models, corner rollers etc. That requires lots of investment, also for rollers seldom used. We solved that problem for you:

Venrooy developed a superstrong, lightweight cable roller which is connectable (horizontally and vertically). This enables you to do virtually all your cablework with one type of roller. The new cable roller has been developed together with cable laying companies and passed all their heavy-usage tests successfully.

- Usable as a standalone roller, and connectable both horizontally and vertically
- Made from lightweight, superstrong polymers
- Base plate with a rough structure for strong grip on the soil

Options

Available in your company colours and with your company logo (min. 250 pcs)

Type: '3 in 1' cable roller				
code	Base plate w. rough structure	Base plate	Size roller mm	Height roller (variable)
